

# dit branch

## Special cases

S1: branch supported on both sides

$$\max(\frac{L}{5}, \frac{R}{5}) - 1 = 4$$

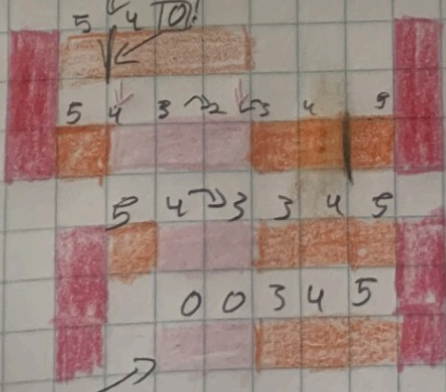

## S2 branch bridge

S1:  
second  
pass →

S2:

↳ Special form of S1: dual support

nothing on the  
other side!

Trunks can't catch branches either!

## branch with support
